Gorgeously designed, with thread-sewn binding and French flaps, this book is printed on Mohawk Superfine paper and illustrated with images from the remarkable geometry and astronomy collections of New College Library. It tells the dual history of astronomy and geometry from the late fourteenth century to the present day in New College, Oxford, and also of the professors over the past four hundred years who have led research and teaching in these mathematical disciplines within both the University and the College.

Oxford: New College Library & Archives, 2019
